

MMT (Myanmar Market Tracker) - Tips & Trick

1. Check Your Internet Connection

MMT requires an active internet connection to load live prices and information.

- Make sure you're connected via Wi-Fi or mobile data.
 - Try opening a website in your browser to confirm your connection.
 - If using Wi-Fi, toggle it off and on again.
 - Move closer to your router if the signal is weak.
 - Try disabling any VPNs, as they can slow down or block connections.
-

2. Force Close and Reopen the App

Sometimes restarting the app fixes temporary glitches.

- **iOS:** Swipe up from the bottom → swipe “Myanmar Market” away.
- **Android:** Tap the recent apps/overview button → swipe the app away.

Reopen MMT and try again.

3. Check for App Updates

Updates often include performance improvements and bug fixes.

- Open the **App Store** (iOS) or **Google Play Store** (Android)
 - Search for **Myanmar Market**
 - If you see **Update**, install it and reopen the app.
-

4. Restart Your Device

A simple reboot can fix various system-related issues.

- Turn your device off completely
 - Wait 10–15 seconds
 - Turn it back on and open MMT again
-

5. Clear App Cache/Data (Android Only)

Clearing the app cache can fix loading or display issues.

- Go to **Settings > Apps > Myanmar Market > Storage**
- Tap **Clear Cache**
- If the issue continues, tap **Clear Data** (this resets the app to default settings)

Open MMT again and try loading prices.

6. Check if MMT Servers Are Down

If data isn't loading, our servers might be experiencing temporary downtime.

- Visit a site like **downdetector.com**
 - Search for **Myanmar Market Tracker** or similar
 - You can also check our **official website or social media** for outage or maintenance announcements
-

7. Uninstall and Reinstall the App

Reinstalling is a quick way to fix corrupted files or incomplete updates.

- Delete the MMT app

- Reinstall it from the App Store or Google Play
 - Open the app and check if the issue is resolved
-

8. Check Device Compatibility

MMT works best on modern versions of iOS and Android.

- Ensure your device is running an up-to-date operating system
 - Older devices may not fully support the latest features or updates
-

9. Enable Required Permissions

MMT may need certain permissions to function properly (e.g., for location-based fuel prices).

- Go to **Settings > Apps > Myanmar Market > Permissions**
 - Make sure permissions such as **Location** (optional) are enabled if you use related features
-

10. Free Up Storage Space

Low storage can cause apps to freeze or crash.

- Delete unused apps or files to create space
 - Restart your device and open MMT again
-
